

**AMENDMENTS TO THE CLAIMS**

**This listing of claims will replace all prior versions and listings of claims in the application:**

**LISTING OF CLAIMS:**

1-6. (canceled).

7. (currently amended): Conductive paste being capable of exerting an extremely excellent printing property,

which comprises ~~the binder resin for coating paste according to claim 1, conductive powder and an organic solvent~~

a) a modified polyvinyl acetal resin comprising structural units represented by the following general formulas (1), (2), (3) and (4):-

in the formulas, R<sup>1</sup> represents a straight chain or branched alkyl group having 1 to 20 carbon atoms, and R<sup>2</sup> represents hydrogen, a straight chain, branched or cyclic alkyl group having 1 to 20 carbon atoms, or an aryl group; and n represents an integer of 1 to 8; and further in the modified polyvinyl acetal resin, a content of the structural unit represented by the general formula (3) is 1 to 20 mol% and a content of the structural unit represented by the general formula (4) is 30 to 78 mol%;

(b) conductive powder; and

(c) an organic solvent.

8. (currently amended): Ceramic paste being capable of exerting an extremely excellent printing property,

which comprises the binder resin for coating paste according to claim 1, ceramic powder and an organic solvent.

(a) a modified polyvinyl acetal resin comprising structural units represented by the following general formulas (1), (2), (3) and (4):

in the formulas, R<sup>1</sup> represents a straight chain or branched alkyl group having 1 to 20 carbon atoms, and R<sup>2</sup> represents hydrogen, a straight chain, branched or cyclic alkyl group having 1 to 20 carbon atoms, or an aryl group; and n represents an integer of 1 to 8; and further in the modified polyvinyl acetal resin, a content of the structural unit represented by the general formula (3) is 1 to 20 mol% and a content of the structural unit represented by the general formula (4) is 30 to 78 mol%;

(b) ceramic powder; and

(c) an organic solvent

9. (currently amended): Glass paste being capable of exerting an extremely excellent printing property,

which comprises the binder resin for coating paste according to claim 1, glass powder and an organic solvent.

(a) a modified polyvinyl acetal resin comprising structural units represented by the following general formulas (1), (2), (3) and (4):

in the formulas,  $R^1$  represents a straight chain or branched alkyl group having 1 to 20 carbon atoms, and  $R^2$  represents hydrogen, a straight chain, branched or cyclic alkyl group having 1 to 20 carbon atoms, or an aryl group; and n represents an integer of 1 to 8; and further in the modified polyvinyl acetal resin, a content of the structural unit represented by the general formula (3) is 1 to 20 mol% and a content of the structural unit represented by the general formula (4) is 30 to 78 mol%;

(b) glass powder; and

(c) an organic solvent.

10-20. (canceled).
